EDUCATION

University of Guelph

Bachelor of Computing, Computer Science, Minor in Business

Guelph, ON

Sept. 2022 - Present

EXPERIENCE

Course Interpreter (CIS Courses)

University of Guelph

September 2023 - Present

Guelph, ON

- Ensured clear communication and inclusivity in exams, implementing adaptive strategies for diverse learning styles and contributing to academic success.
- Cultivated positive relationships with students and staff, fostering diversity and accessibility within the academic community.
- Played a pivotal role in upholding university policies and procedures related to accommodations.

Tutor

Self-Employed

August 2021 - February 2023

Woodstock, ON

- Enhanced students' coding proficiency in Java and HTML through engaging, project-based learning sessions.
- Designed and implemented structured tutoring sessions to impart a solid foundation, equipping students with the skills necessary to independently develop and execute coding projects.
- Tailored instructional approaches to accommodate diverse learning styles, ensuring that each student grasped the fundamental concepts.
- students independently showcased successful applications in real-world programming scenarios, highlighting the efficacy of the instructional methods.

PROJECTS

Weather App

HTML, CSS, JavaScript

November 2023 - December 2023

- Developed a sophisticated weather application using HTML, CSS, and JavaScript, featuring a user-friendly interface and exceptional UI/UX design.
- Utilized API integration to dynamically fetch and display weather data, showcasing a robust technical skill set and the ability to leverage external resources for enhanced functionality.
- Demonstrated problem-solving skills by addressing challenges in presenting complex weather data in a comprehensible and visually appealing manner, resulting in a polished and effective final product.

Recipe App

HTML, CSS, JavaScript

November 2023 - December 2023

- Engineered a dynamic recipe application using HTML, CSS, and JavaScript, offering users a seamless experience in searching and discovering diverse dishes with clear instructions and ingredients.
- Designed and implemented an aesthetically pleasing and user-friendly recipe app, demonstrating a focus on intuitive UI/UX to enhance user engagement and satisfaction.
- Leveraged API integration to dynamically source and display recipe data, showcasing advanced technical proficiency in front-end development and effective data retrieval techniques.

Mancala Game

Java

September 2023 - November 2023

- Developed an interactive Mancala Game in Java, incorporating a graphical user interface (GUI) to provide an engaging and user-friendly experience, offering players the option to play under both Kalah and Ayoayo rule sets.
- Leveraged Java's capabilities to create an aesthetically pleasing and responsive GUI, enhancing the overall user experience and making the game accessible to players with varying levels of expertise.
- Implemented robust error-handling mechanisms and optimized code efficiency in the Mancala Game, ensuring a smooth and reliable gaming experience for users.
